

LEEDS BRADFORD AIRPORT

Large format displays and custom lightboxes.

Utilizing a selection of large format displays and a locally hosted CMS

Intevi were awarded the contract to supply, install and maintain a full digital advertising network at Leeds International Airport.

The airport now runs an internally hosted Content Management System and NEC large format display setup, comprising of 55" . 70" and a 2x55" video wall.

Intevi installed large format displays throughout the airport in order to deliver high quality, dynamic content to all customers.

The Digital Posters are animated,

dynamic and controlled by a locally hosted Content Management System.

This allows the displays to be easily kept up to date with the

latest content, whether that is advertisements, airport and flight information or any kind of digital content.
